

Acknowledgements

I am grateful to the following for help and advice: the staff of Ipswich Record Office, Michael Stammers, Peter Barber and Chris Farmer. The map is reproduced courtesy of the New Orford Town Trust. Getmapping plc kindly gave permission for use of the photographic underlay of the illustration on p4.

Notes

1. SRO(I): EE5/11/8. The map has suffered water damage. It measures 60 x 36cm and is catalogued with another Norden map: EE5/11/9.
2. *Tooley's Dictionary of Mapmakers*, p322.
3. SRO(I): V5/22/1 & HD88/4/1.
4. Fenwick & Harrup, *Untold tales from the Suffolk Sandlings*
5. These are shown on Sheet XXIII of the estate survey completed the following year.
6. Variant spellings and etymology are discussed by Sandahl, *Middle English Sea Terms*, 1, pp57-59, who did not find the word between 1410 and 1611, so this is a new occurrence.
7. See Baker, *The Mayflower and Other Colonial Vessels*.
8. Not a gradual process, but the result of exceptional storms, such as that of 2 February 1791. A Suffolk diarist, William Goodwin noted that the tide was the highest known in the memory of man and that Lantern Marshes were feared lost forever, 'the sea having made a complete harbour into them, 40 rods wide which the engineers think can never be stopped.' SRO(I) : HD 365/1.
